Mixed Generation Events

Mixed Generation (MXG) events are round-robin tournaments where team members differ in age by approximately 20 years (or more). This is a wonderful opportunity to demonstrate the universal appeal of Pickleball. Seniors will often take the lead to share the game with their children and grandchildren. The Holiday MXG Festival scheduled during the Christmas holiday in SE Michigan is an example of such an event where 2 hours of recreational play will be followed by 2 hours of competitive play. The goals of this and other MXG events are to teach younger players that Pickleball is a fun sport that they can play for a lifetime. These events will also be used to introduce the notion of State Games for all ages and to encourage younger players to continue to play the game.
